

# Glucose/Sugar Testing

- Gestational screen T# 1102**  
(24 to 28 wks gestation)

Fasting is not required for this test.

At the start of the test, you will be given a 50 gram orange flavored glucola to drink. Please try to finish within 5 to 10 min. The 1 hour clock starts after the whole 50 grams is ingested.

Patient should be resting as much as possible during the test.

1 tube of blood is drawn at the end of the hour.
