## Maternal Infant Health Program

The goal of the Maternal Infant Health Program (MIHP) is to help you have a healthy pregnancy.

A nurse, nutritionist and a social worker will meet with you to provide teaching materials, help you find community resources and solve problems.

We also have nurses who will make home visits. The Maternal Infant Health Program is in addition to your regularly scheduled visits with your doctor for prenatal care.

## Program Eligibility

If you are pregnant and are eligible for either Medicaid or Healthy Kids, then you are eligible for the Maternal Infant Health Program. There is no charge for participation.

## Program Services:

- Bus tokens or paid mileage for doctor visits or other pregnancy-related appointments.
- Help with personal problems that may complicate pregnancy.
- Prenatal teaching about your changing body and the growth and development of your baby.
- Childbirth education classes.
- Nutritional support and education.
- Newborn baby assessments.
- Infant growth and development teaching.
- Weight and measurements of your baby.
- Referrals to community resources and help in finding baby cribs, car seats, clothing, food and housing.
- Support to stop smoking.
- Nurse home visits.

## Participant Responsibilities

-  Notify your MIHP team if you must reschedule a visit.
-  Contact your MIHP team if you have a concern between scheduled visits.
-  Keep prenatal appointments with your doctor.
-  Notify the office if transportation is a problem.
-  Follow through with referral for other services.
-  Attend childbirth education classes if you choose to enroll.
-  Notify your MIHP nurse when your baby is born.
-  Notify your MIHP team if you move or change your phone number.
