

# ALL INPATIENT PROGRAM OUTCOMES

Mary Free Bed  
Rehabilitation

**Service Dates:** January 1, 2018 through December 31, 2018

## STRIVING FOR EXCELLENCE

Mary Free Bed provides the most comprehensive rehabilitative services in the state. Sparrow is the largest provider of inpatient rehabilitative care in mid-Michigan and the region's only Level 1 Trauma Center. Mary Free Bed at Sparrow offers highly specialized inpatient rehabilitative care for the mid-Michigan region. At Mary Free Bed at Sparrow we use an outcome tool called FIM™, which is the most widely accepted measurement system in medical rehabilitation. This tool compares our patients' outcomes with other similar inpatient rehabilitation programs in the nation as a way of letting us know how we are doing. This report demonstrates who we served in the year 2018 and how a number of our important performance measures compared to the nation.

## PATIENT SATISFACTION

Mary Free Bed at Sparrow was recognized by Professional Research Consultants as the top performer in the nation for inpatient rehabilitation units with a 100 percent rating in Overall Quality of Care.

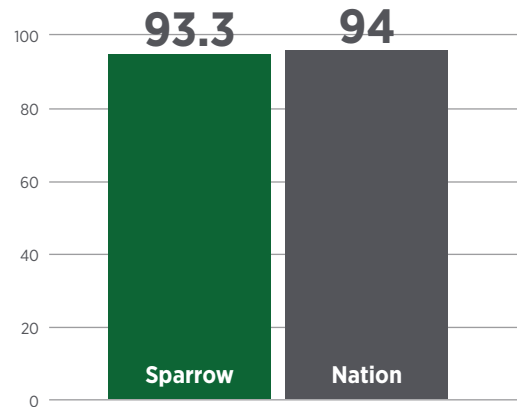

## DISCHARGE TO HOME & COMMUNITY

Below shows the percentage of patients able to return to living in the community.

## FUNCTIONAL IMPROVEMENT

We measure, using a point system, how much progress a person makes by using the FIM™ outcome scale. The FIM™ scale categories table shows the areas that are evaluated and the graph below illustrates how our discharge scores compare.

## MEASURING FUNCTIONAL IMPROVEMENT

Using the FIM™ Scale

The FIM™ (Functional Independence Measure) scale is the most widely accepted functional assessment measurement system in inpatient medical rehabilitation. It measures the "most common" daily living skills needed to function. FIM™ provides a basis to standardize and measure progress. Each FIM™ area is scored on a 1-7 point scale, ranging from complete independence (7) to total dependence (1).

FIM™ SCALE CATEGORIES	
<b>Self-Care</b>	Eating Dressing/upper body Grooming Dressing/lower body Bathing Toileting
<b>B/B Management</b>	Bladder management Bowel management
<b>Mobility</b>	Mobility (Bed, chair, wheelchair) Transfers (Toilet) Transfers (Tub, shower)
<b>Locomotion</b>	Walk or wheelchair Stairs
<b>Communication</b>	Comprehension Expression
<b>Cognition</b>	Social interaction Problem solving Memory

Mary Free Bed  
Rehabilitation

Service Dates: January 1, 2018 through December 31, 2018

## PATIENTS SERVED BY DIAGNOSIS

The chart below shows, by percentage, the diagnoses of those we serve.

## AVERAGE HOURS OF THERAPY PER DAY

In 2018, our patients averaged 3.15 hours of therapy five out of seven days, exceeding Medicare-mandated minimums for inpatient rehabilitation programs.

## PERSONS SERVED

NUMBER OF PERSONS SERVED: **963**

## UNPLANNED TRANSFERS FOR ACUTE CARE<sup>1</sup>

Under certain circumstances, a patient may demonstrate changes in his or her medical condition that warrant a transfer to acute care for close medical monitoring. If this occurs, patients are transferred to acute care services and typically return to the inpatient rehabilitation program within a few days. During 2018, the frequency of these transfers for all adult patients at Mary Free Bed at Sparrow was 5.6% compared to the national average of 8.53.

## ONSET DAYS

Onset days refers to how soon the patient comes to rehabilitation after the initial diagnosis or injury. We are able to admit and start rehabilitation two days sooner compared to the national average.

## LENGTH OF STAY

The average number of days our patients stay with us is similar to the national average.

Mary Free Bed at Sparrow is committed to providing quality care. Our goal is to work with you to get you back to the things that matter most – to you!

Thank you for considering Mary Free Bed at Sparrow for your rehabilitation needs.
