

Sparrow's pledge to the community

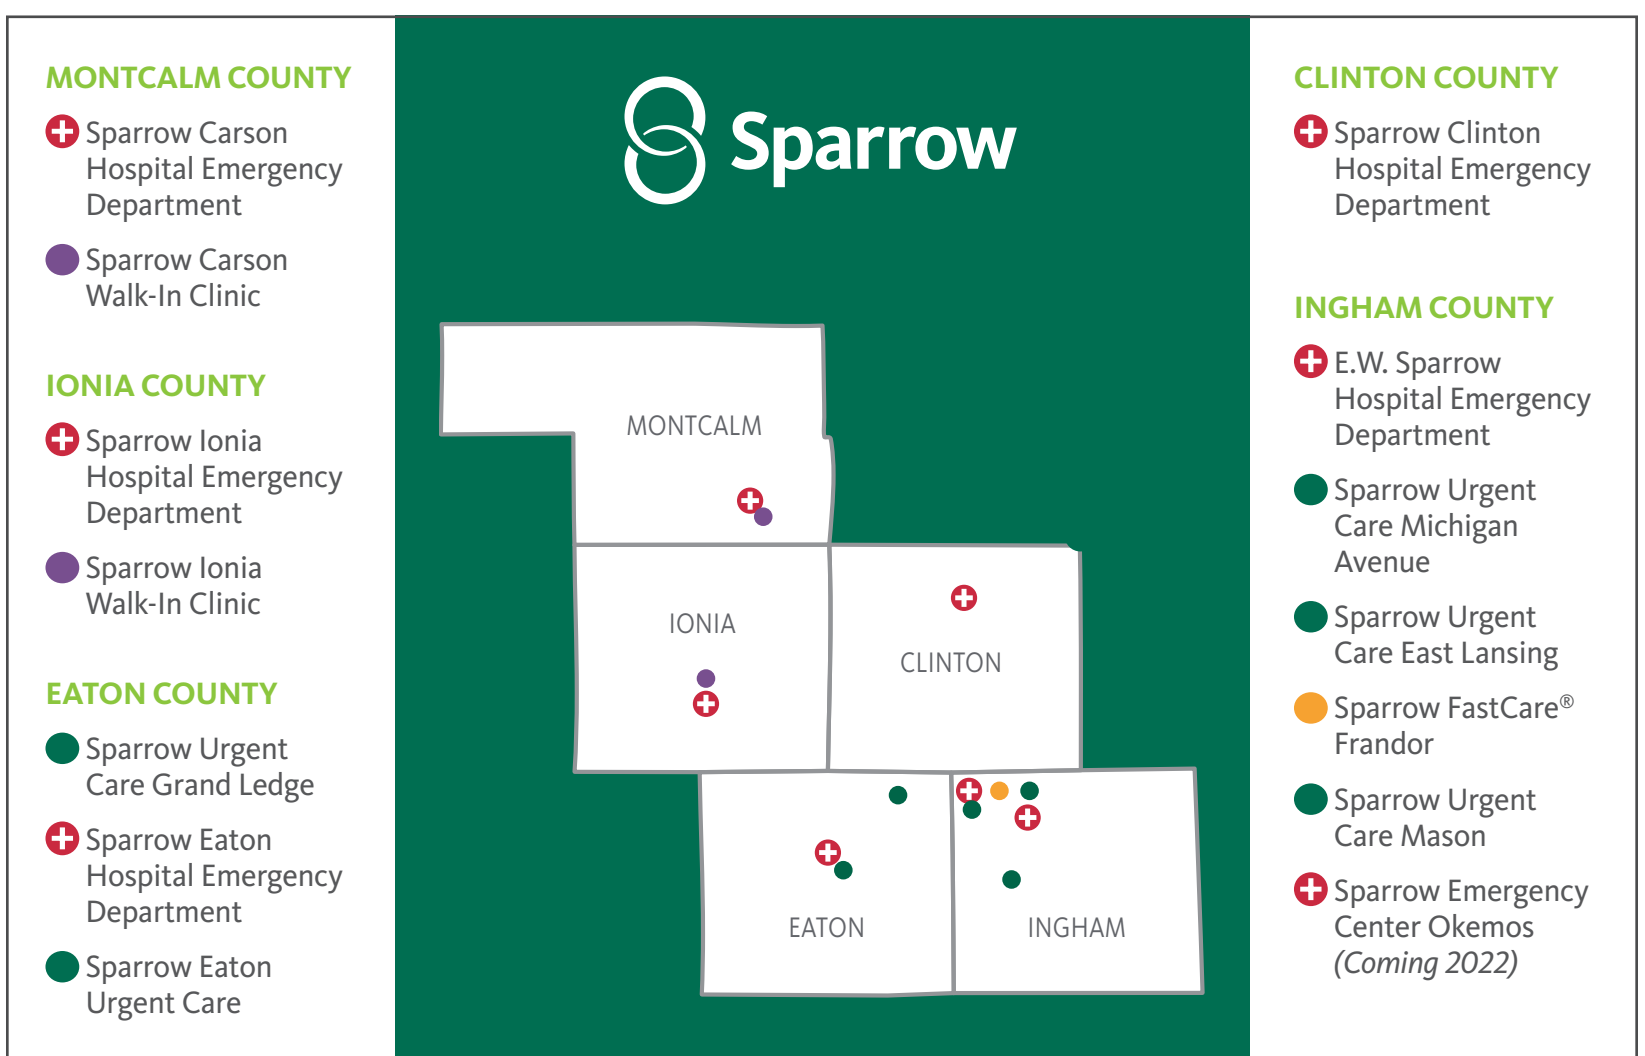

From Sparrow Health System

As the region's only community-owned, community-based, community-led health system, we've got you covered as Mid-Michigan's healthcare leader.

But you have no doubt heard about the intense pressure put on health systems throughout the state.

In particular, every Emergency Department in Michigan is experiencing untold volumes of patients – most of them not related to COVID. To ease the pressure on our Emergency Departments, we've created many ways for you to access us in the timeliest manner using the most appropriate level of care.

As this map shows, we have numerous options available to you besides the Emergency Department. And there's more to come in summer 2022 with the opening of our new Sparrow Emergency Center Okemos location on Jolly Road in Meridian Township, with state-of-the-art medical offices and a freestanding Emergency Department.

We will protect the health of the community no matter the circumstance. It's what we do. **But we are asking you to do your part by using the Emergency Departments for only the most critical cases.**

And remember: Get vaccinated. Wear a mask.

Thank you.

James F. Dover, FACHE
President and CEO
