

# NEUROLOGICAL REHABILITATION OUTCOMES

Mary Free Bed  
Rehabilitation

at Sparrow

Service Dates: Jan. 1, 2022 through Dec. 31, 2022

## RESTORING HOPE AND FREEDOM

*Innovation • Compassion • Accountability • Respect • Excellence*

Mary Free Bed at Sparrow, mid-Michigan's regional provider of inpatient rehabilitation, restores hope and freedom to people who have sustained neurological injuries as a result of trauma, stroke, tumor, anoxic injury or infection.

In 2022, our experienced team of clinicians cared for 501 patients with a neurological diagnosis. This report highlights outcomes using the Quality Reporting Program (QRP), the most widely accepted assessment tool in inpatient medical rehabilitation. The point system compares our patients' outcomes with similar inpatient rehabilitation programs across the nation.

TOP PERFORMER IN THE NATION 5 YEARS IN A ROW

## PATIENT SATISFACTION

Mary Free Bed at Sparrow earned special distinction as the Top Performer in "Overall Quality of Care" for inpatient rehabilitation by Professional Research Consultants.

## DEFINITIONS:

**Onset:** The average number of days from the time of injury or diagnosis to when the patient enters inpatient rehabilitation. The sooner a person begins rehabilitation, the better the outcome.

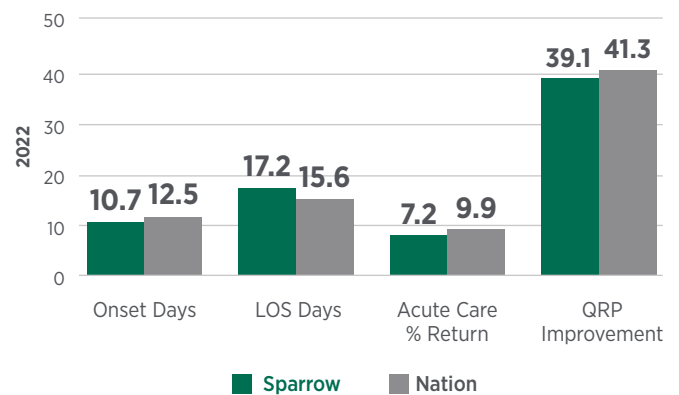

**LOS:** Length of stay, or the average number of days the patient is in the rehabilitation program.

**Acute care:** Sometimes a patient develops a medical condition that may be unexpected or, in some cases, is planned, that results in a return to the acute-care hospital.

**QRP:** QRP (Quality Reporting Program) is an assessment tool used in inpatient rehabilitation. The QRP scale measures the level of functional improvement gained from admission to discharge for a variety of skills and abilities used in daily life.

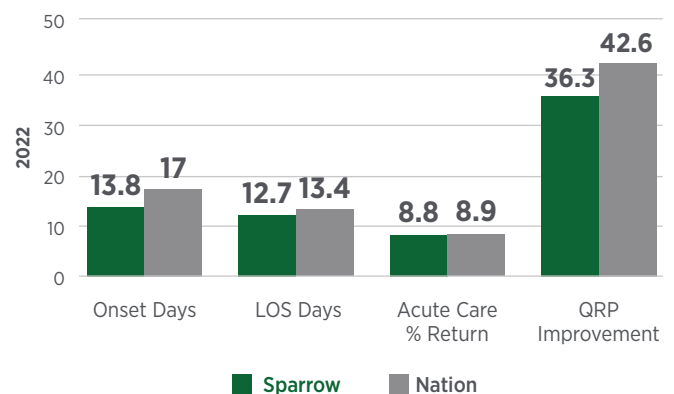

## STROKE

Patients Served: 222

## TRAUMATIC BRAIN INJURY

Patients Served: 124
