

MARY FREE BED AT SPARROW REHABILITATION OUTCOMES REPORT

Mary Free Bed
Rehabilitation

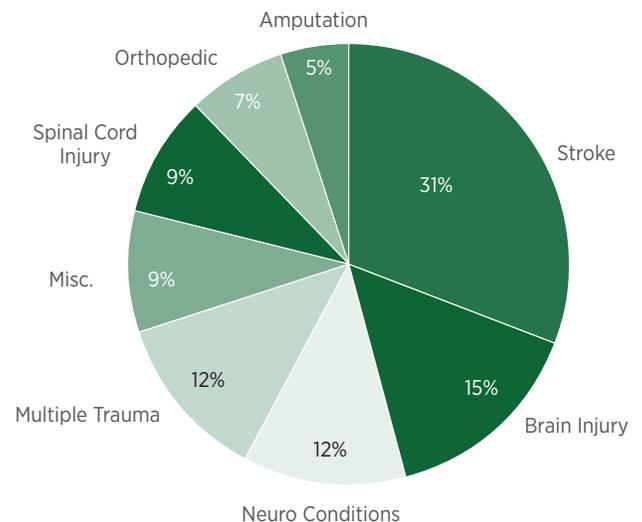

Service Dates: January 1, 2014 through December 31, 2014

STRIVING FOR EXCELLENCE

Mary Free Bed provides the most comprehensive rehabilitative services in the state. Sparrow is the largest provider of inpatient rehabilitative care in mid-Michigan and the region's only Level 1 Trauma Center. Mary Free Bed at Sparrow offers highly specialized inpatient rehabilitative care for the mid-Michigan region. At Mary Free Bed at Sparrow we use an outcome tool called FIM™, which is the most widely accepted measurement system in medical rehabilitation. This tool compares our patients' outcomes with other similar inpatient rehabilitation programs in the region as a way of letting us know how we are doing. This report demonstrates who we served in 2014 and how a number of our important performance measures compared to the region.

PATIENTS SERVED BY DIAGNOSIS

The chart below shows, by percentage, the diagnoses of those we served in 2014. We also treat patients with other conditions that include cardiac, pulmonary, pain and cancer.

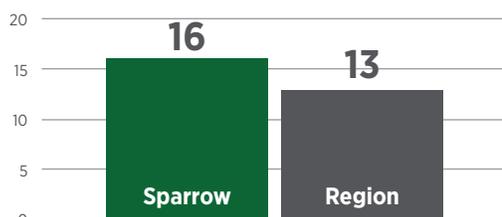

PERSONS SERVED

NUMBER SERVED: **469**
60% Men
40% Women

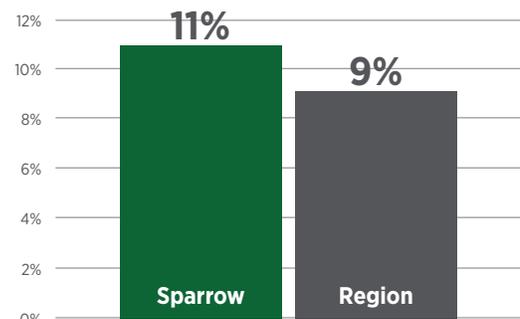

LENGTH OF STAY

Below is a representation of the average number of days our patients stayed in our inpatient rehabilitation program.

UNPLANNED TRANSFERS TO ACUTE CARE

Sometimes, after a person is admitted into the rehabilitation program, he or she may develop an unexpected medical condition that requires a return to the acute care hospital. The graph below shows the percentage of people we cared for who needed to return to the acute care hospital compared to the region.

AVERAGE HOURS OF THERAPY PER DAY

Acute Inpatient Rehabilitation Programs are required by Medicare to provide at least 3 hours of therapy per day, 5 out of 7 days per week. In 2014, our patients averaged 3.57 hours of therapy five out of seven days, exceeding Medicare minimum requirements for inpatient rehabilitation programs.

DISCHARGE TO HOME & COMMUNITY

This graph shows the percentage of patients who were able to return to living in the community. Those patients who did not return to the community were those who returned to the acute care hospital for an unexpected medical condition or who needed to go into a long-term setting as the next step.

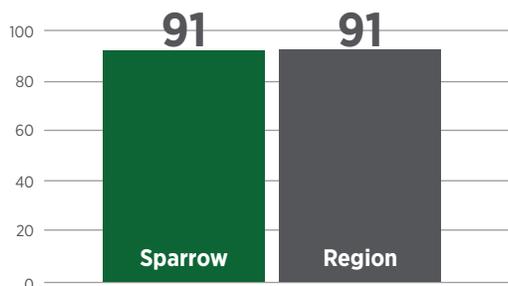

FIM™ SCALE CATEGORIES	
Self-Care	Eating Dressing/upper body Grooming Dressing/lower body Bathing Toileting
B/B Management	Bladder management Bowel management
Mobility	Mobility (Bed, chair, wheelchair) Transfers (Toilet) Transfers (Tub, shower)
Locomotion	Walk or wheelchair Stairs
Communication	Comprehension Expression
Cognition	Social interaction Problem solving Memory

Mary Free Bed at Sparrow is committed to providing quality care. Our goal is to work with you to get you back to the things that matter most – to you! Thank you for considering Mary Free Bed at Sparrow for your rehabilitation needs.

To refer a patient, please call 517.364.4610.

FUNCTIONAL IMPROVEMENT

We measure how much progress a person makes by using the FIM™ outcome scale. The table shows the functional areas that are evaluated and the graph illustrates how our discharge scores compare.
